Timothy Marcelleon

Front-End / Full-Stack Software Engineer | React · TypeScript · Next.js · Node.js

Adelaide, SA | +61 468 459 432 | timothy.m121212@gmail.com | linkedin.com/in/timothy-marcelleon-160083175

Full working rights in Australia

PROFESSIONAL SUMMARY

Front-End Software Engineer with 5+ years of experience building React and TypeScript web applications for high-traffic payments and e-commerce platforms, banking products and internal admin tools. Proven at scale on a platform serving 50M+ users and 5M+ daily transactions, with full-stack capability across Node.js, Socket.IO real-time services, REST/GraphQL APIs and data modelling. Seeking mid-level Frontend, React or Full-Stack roles in Adelaide, Sydney, Melbourne or remote within Australia.

TECHNICAL SKILLS

Core: TypeScript, JavaScript, React, Next.js, HTML, CSS

Also: Vue, Nuxt, Node.js, Socket.IO, GraphQL, REST APIs, Jest, Webpack

Data / Infra: SQL, MySQL, New Relic, AWS, GCP

Other languages: Python, PHP, C++, Java

Practices: Agile, SOLID principles, ERD and data modelling, API integration, debugging and performance optimisation, Git/GitHub, npm/pnpm

PROFESSIONAL EXPERIENCE

Front-End Software Engineer

Xinchuan Management | Taipei, Taiwan | Jun 2023 – Present

- Led front-end development and maintenance of three service platforms (voucher, SIM card and food services) serving 30,000+ users and handling 3,000+ daily orders, improving system stability and user satisfaction.
- Prioritised and delivered a high-volume front-end task queue, consistently meeting project milestones.
- Designed and built a real-time Node.js / Socket.IO server enabling live chat between mobile apps and internal web admin tools, streamlining communication workflows.
- Translated complex client requirements into entity-relationship diagrams (ERDs) with stakeholders, enabling accurate data modelling and efficient database design.

Software Engineer

Tokopedia | Jakarta, Indonesia | Jul 2021 – Nov 2022

Leading Indonesian e-commerce platform, now part of Tokopedia–TikTok Shop.

- Delivered payment flows across the Risk and Payment teams for a platform processing 5M+ daily transactions, safeguarding transaction integrity and security.
- Architected and maintained critical payment services handling 10B+ IDR in monthly transactions.
- Delivered a fully typed TypeScript codebase with 100% test coverage, cutting bugs by ~15%.
- Engineered reusable, pluggable components, reducing development time by an estimated 20%.
- Maintained platform stability under peak loads exceeding 50,000 requests per second, using New Relic log and performance monitoring to identify bottlenecks and suspicious activity.
- Troubleshot and resolved complex payment-module bugs, directly improving the transaction experience for 50M+ users.

Frontend Web Developer

Bank BRI – CERIA | Jakarta, Indonesia | Feb 2020 – Aug 2020

One of Indonesia's largest state-owned banks.

- Developed the responsive CERIA website for Bank BRI.
- Built end-to-end authentication flows, including login, registration, OTP verification and password recovery.

- Implemented the core Paylater business flow.

EDUCATION

Master's Degree, Artificial Intelligence | Bina Nusantara University | 2021 – 2022

- Graduated with a GPA of 3.90.
- Published “Evaluating Waste's Hazardousness Using Fuzzy Logic and Simple Additive Weighting” in ICIC Express Letters (ICIC-EL).

Bachelor's Degree, Artificial Intelligence | Bina Nusantara University | 2017 – 2021

- Competed twice in the Indonesia National Contest (INC) programming competition using C++.
- Achieved an A in Algorithms and Data Structures and an A- in Competitive Programming.
